One of his greatest challenges was to find mining claim corners. I remember going with him when he located claims in the Ashcroft area. The triangulation points had names assigned when they were first established, most in the early 1880s. To survey several claims, he needed a point on the ridge on the north side of Taylor Pass.

Willoughby: Triangulation, a look at Colorado through eyes ...

triangulation via aerial photography, conventional survey ties to horizontal control (triangulation stations), GPS observations, or digitized from USGS 7-½ minute topographic quadrangle maps (recovered PLSS corners indicated with a bold tick). The control coordinates' accuracy or "reliability" will vary dependent on the method

Active and Abandoned Gold Claim Locations - Mining

Mining District Sheets (Connecting Sheets) and Master Title Plats often show Mineral Surveys of claims that were never patented, and in most cases the underlying claim is no longer active. On a Master Title Plat these unpatented mineral surveys are indicated by a lighter solid boundary-line than that of a mineral survey that was patented.

A primer on mining claims. Patented and unpatented claims ...

Mining claims may be located by what is know as aliquot part legal description, which is meridian, township, range, section, quarter section, and if applicable quarter-quarter section. These claims are known as MTRSC locations, and they are generally located using GPS latitude and longitude coordinates.
